UNIFORM LIFETIME TABLE

Retired qualified plan participants and IRA owners generally must begin taking distributions by April 1st of the year after the year in which they turn age 70½. The annual required minimum distributions (RMDs) are based upon the joint life expectancy of the participant/IRA owner and a hypothetical beneficiary who is 10 years younger. These factors are found in the Uniform Lifetime Table.

If the sole designated beneficiary on the account is a spouse who is more than 10 years younger, their RMDs are based on an IRS joint life expectancy. This table can be found in Appendix B of IRS Publication 590-B and produces a smaller RMD than the Uniform Lifetime Table.

Note – Do not use this table for inherited IRAs and qualified plan accounts. The Single Life Table is used for those accounts. It is found in IRS Publication 590-B as Table I of Appendix B.
